Table of Contents

Rheology of Thermosets.....

Introduction to Rheology Measurements

Rheometers

Controlled Strain Measurements.....

Isothermal Curing.....

Non-isothermal Curing

Using Non-isothermal Rheology to Optimize Thermoset Processing.....

Correlation of Viscosity and Degree of Cure During Non-isothermal Curing.....

Correlation of the Viscosity, Tg, and Conversion During Non-isothermal Curing
(part two).....

Correlation of the Viscosity, Tg, and Conversion During Non-isothermal Curing
(part three)

Putting it All Together to Study a Composite Lamination Process

Composite Lamination Case Study – 1

Composite Lamination Case Study – 2.....

Composite Lamination Case Study – 3.....

Composite Lamination Case Study – 4.....

Composite Lamination Case Study – 5.....

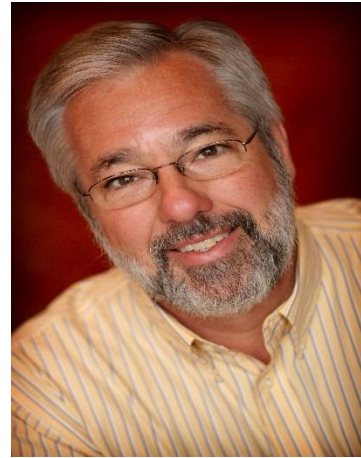

Lamination Case Study – 6.....

Lamination Case Study – 7.....

Lamination Case Study – 8.....

Rheology of Thermosets

This eBook will cover my extended series covering the rheology of thermosets. A key aspect of understanding thermosets and their applications is to have a basic knowledge of some of the key testing methods used to characterize both the curing and final properties. In our previous eBook, *Characterization of Thermosets*, we covered the most common thermal analysis methods including an introduction to curing kinetics.

In this eBook, the following topics will be covered:

- Introduction to rheology
- Rheological methods used for thermosets
- Isothermal rheology
- Non-isothermal rheology
- A comprehensive case-study demonstrating some of the key concepts of rheology during thermoset processing
